

Power Maths Calculation Policy, KS1

The following pages show the *Power Maths* progression in calculation (addition, subtraction, multiplication and division) and how this works in line with the National Curriculum. The consistent use of the CPA (concrete, pictorial, abstract) approach across *Power Maths* helps children develop mastery across all the operations in an efficient and reliable way. This policy shows how these methods develop children's confidence in their understanding of both written and mental methods.

KEY STAGE 1

Children develop the core ideas that underpin all calculation. They begin by connecting calculation with counting on and counting back, but they should learn that understanding wholes and parts will enable them to calculate efficiently and accurately, and with greater flexibility. They learn how to use an understanding of 10s and 1s to develop their calculation strategies, especially in addition and subtraction.

Key language: whole, part, ones, ten, tens, partition, number bond, add, addition, plus, total, altogether, subtract, subtraction, find the difference, take away, minus, less, more, group, share, equal, equals, is equal to, groups, equal groups, times, multiply, multiplied by, divide, share, shared equally, times-table

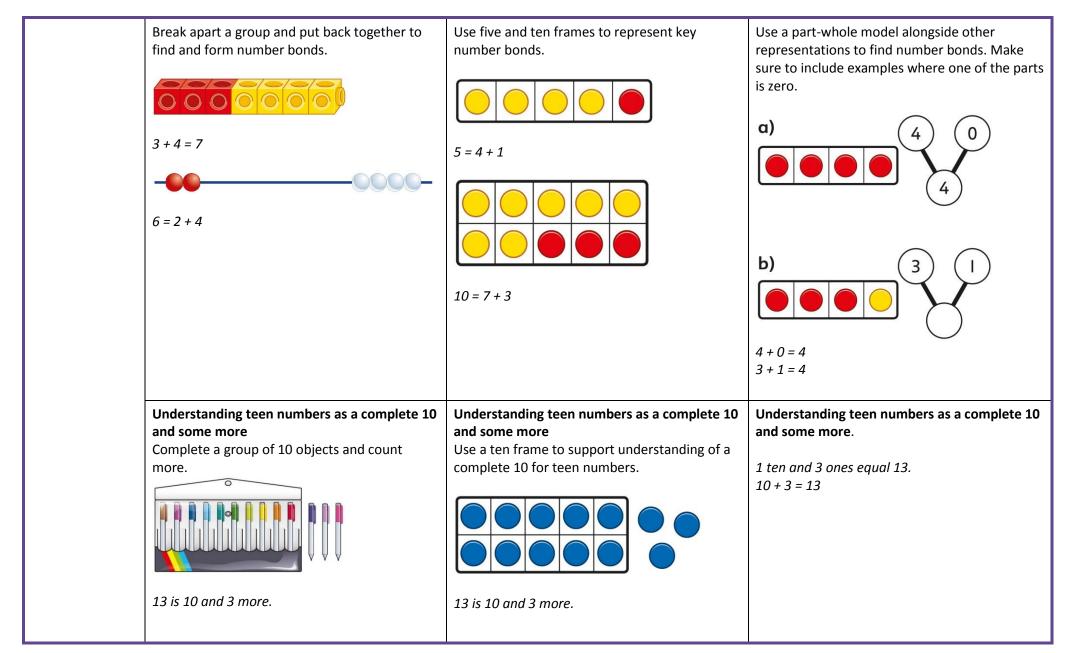

Addition and subtraction: Children first learn to connect addition and subtraction with counting, but they soon develop two very important skills: an understanding of parts and wholes, and an understanding of combining 10s, to develop efficient and effective calculation strategies based on known number bonds and an increasing awareness of place value. Addition and subtraction are taught in a way that is interlinked to highlight the link between the two operations. A key idea is that children will select methods and approaches based on their number sense. For example, in Year 1, when faced with 15 – 3 and 15 – 13, they will adapt their ways of approaching the calculation appropriately. The teaching should always emphasise the importance of mathematical thinking to ensure accuracy and flexibility of approach, and the importance of using known number facts to harness their recall of bonds within 20 to support both addition and subtraction methods. In Year 2, they will start to see calculations presented in a column format, although this is not expected to be formalised until KS2. We show the column method in Year 2 as an option	Multiplication and division: Children develop an awareness of equal groups and link this with counting in equal steps, starting with 2s, 5s and 10s. In Year 2, they learn to connect the language of equal groups with the mathematical symbols for multiplication and division. They learn how multiplication and division can be related to repeated addition and repeated subtraction to find the answer to the calculation. In this key stage, it is vital that children explore and experience a variety of strong images and manipulative representations of equal groups, including concrete experiences as well as abstract calculations. Children begin to recall some key multiplication facts, including doubles, and an understanding of the 2, 5 and 10 times-tables and how they are related to counting.	Fractions: In Year 1, children encounter halves and quarters, and link this with their understanding of sharing. They experience key spatial representations of these fractions, and learn to recognise examples and non-examples, based on their awareness of equal parts of a whole. In Year 2, they develop an awareness of unit fractions and experience non-unit fractions, and they learn to write them and read them as numerator and denominator.

Power Maths © Pearson 2019

		Year 1	
	Concrete	Pictorial	Abstract
Year 1 Addition	Counting and adding more Children add one more person or object to a group to find one more.	Counting and adding more Children add one more cube or counter to a group to represent one more.	Counting and adding more Use a number line to understand how to link counting on with finding one more one more 0 1 2 3 4 5 6 7 8 9 10
		One more than 4 is 5.	One more than 6 is 7. 7 is one more than 6. Learn to link counting on with adding more than one. 0 1 2 3 4 5 6 7 8 9 10 5 + 3 = 8
	Understanding part-part-whole relationship Sort people and objects into parts and understand the relationship with the whole.	Understanding part-part-whole relationship Children draw to represent the parts and understand the relationship with the whole.	Understanding part-part-whole relationship Use a part-whole model to represent the numbers. 10 6 46 $+$ 4 $=$ 10
	The parts are 2 and 4. The whole is 6.	The parts are 1 and 5. The whole is 6.	6 + 4 = 10
	Knowing and finding number bonds within 10	Knowing and finding number bonds within 10	Knowing and finding number bonds within 10

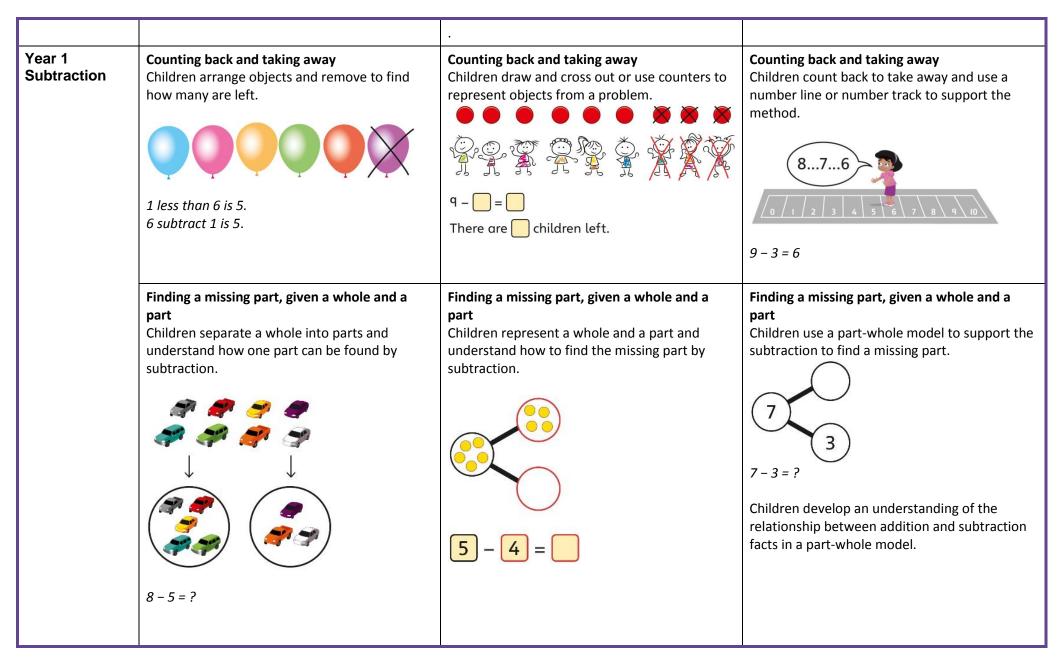

Finding the difference Arrange two groups so that the difference between the groups can be worked out.	Finding the difference Represent objects using sketches or counters to support finding the difference.	Finding the difference Children understand 'find the difference' as subtraction.
Image: Second state of the second s	5 - 4 = 1 The difference between 5 and 4 is 1.	$\begin{array}{c} & & & \\ \hline & & & \\ 0 & 1 & 2 & 3 & 4 & 5 & 6 & 7 & 8 & 9 & 10 \\ 10 - 4 = 6 \\ The difference between 10 and 6 is 4. \end{array}$
Subtraction within 20 Understand when and how to subtract 1s efficiently.	Subtraction within 20 Understand when and how to subtract 1s efficiently.	Subtraction within 20 Understand how to use knowledge of bonds within 10 to subtract efficiently.
Use a bead string to subtract 1s efficiently. 5-3=2 15-3=12	$6 \\ 6 \\ 6 \\ 6 \\ 6 \\ 6 \\ 6 \\ 6 \\ 6 \\ 6 \\$	5 - 3 = 2 15 - 3 = 12
Subtracting 10s and 1s For example: 18 – 12	Subtracting 10s and 1s For example: 18 – 12	Subtracting 10s and 1s Use a part-whole model to support the calculation.

	Subtract 12 by first subtracting the 10, then the remaining 2.	Use ten frames to represent the efficient method of subtracting 12.	14
			$ \begin{array}{c} 10 \\ 19 - 14 \\ 19 - 10 = 9 \\ 9 - 4 = 5 \end{array} $
	First subtract the 10, then take away 2.	First subtract the 10, then subtract 2.	<i>So, 19 – 14 = 5</i>
	Subtraction bridging 10 using number bonds For example: 12 – 7 Arrange objects into a 10 and some 1s, then decide on how to split the 7 into parts. Image: Image object in the state of the	Subtraction bridging 10 using number bonds Represent the use of bonds using ten frames.	Subtraction bridging 10 using number bonds Use a number line and a part-whole model to support the method. 13-5 5 6 7 8 9 10 11 12 13
Year 1 Multiplication	Recognising and making equal groups Children arrange objects in equal and unequal groups and understand how to recognise whether they are equal. A B C Image: Complex of the stand of the standow o	Recognising and making equal groups Children draw and represent equal and unequal groups.	Describe equal groups using words <i>Three equal groups of 4.</i> <i>Four equal groups of 3.</i>
	Finding the total of equal groups by counting in 2s, 5s and 10s	Finding the total of equal groups by counting in 2s, 5s and 10s	Finding the total of equal groups by counting in 2s, 5s and 10s

	There are 5 pens in each pack 510152025303540	100 squares and ten frames support counting in 2s, 5s and 10s. 1 2 3 4 5 6 7 8 9 10 1 2 3 4 5 6 7 8 9 10 1 1 2 13 14 15 16 17 18 19 20 2 2 2 2 2 4 25 26 27 28 29 30 3 3 2 3 3 4 35 36 37 38 39 40 4 4 2 4 3 4 4 4 5 4 6 47 4 8 49 50	Use a number line to support repeated addition through counting in 2s, 5s and 10s. 10 10 10 10 10 10 10 10 10 10
Year 1 Division	Grouping Learn to make equal groups from a whole and find how many equal groups of a certain size can be made.Sort a whole set people and objects into equal groups.Image: Image: I	Grouping Represent a whole and work out how many equal groups. There are 10 in total. There are 5 in each group. There are 2 groups.	Grouping Children may relate this to counting back in steps of 2, 5 or 10.
	Sharing Share a set of objects into equal parts and work out how many are in each part.	Sharing Sketch or draw to represent sharing into equal parts. This may be related to fractions. Image: Construction of the second seco	Sharing 10 shared into 2 equal groups gives 5 in each group.

	Year 2			
	Concrete	Pictorial	Abstract	
Year 2 Addition				
Understanding 10s and 1s	Group objects into 10s and 1s.	Understand 10s and 1s equipment, and link with visual representations on ten frames.	Represent numbers on a place value grid, using equipment or numerals.	
Adding 10s	Use known bonds and unitising to add 10s. ())) ()) ()) ()) ()) ()) ()) ()) ()) ()	Use known bonds and unitising to add 10s. Use known bonds and unitising to add 10s. 4 + 4 = 4 4 + 3 = 7. So, 1 know that 4 tens add 3 tens is 7 tens.	Use known bonds and unitising to add 10s. $\begin{array}{r}7\\4\\4\\3\\4+3=\end{array}$ $\begin{array}{r}4+3=7\\4\ tens+3\ tens=7\ tens\\40+30=70\end{array}$	

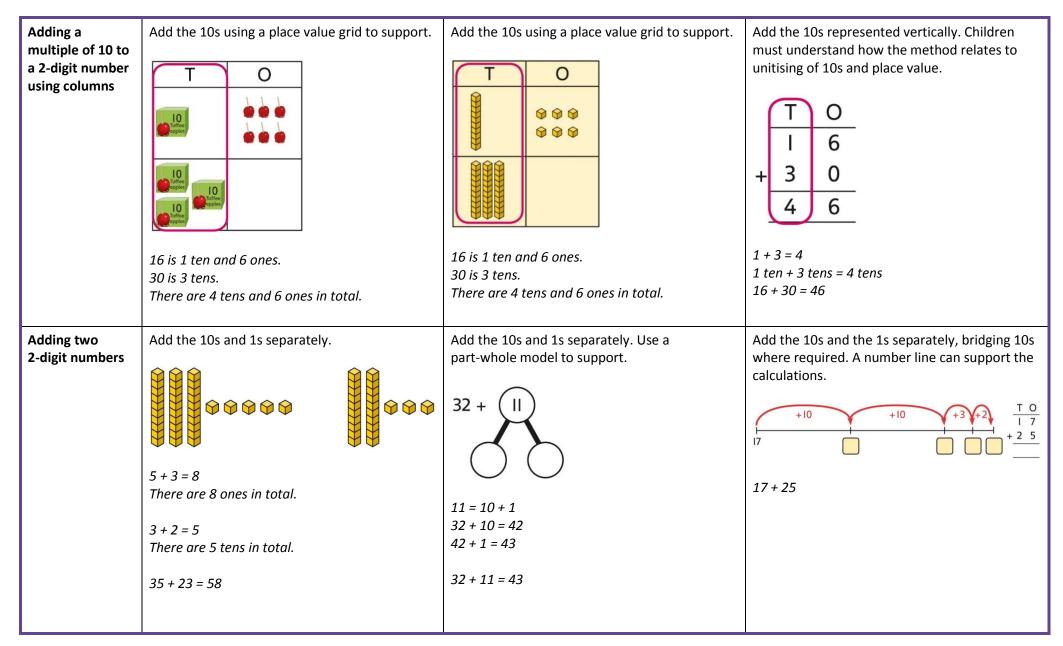

Adding two 2-digit numbers using a place value grid	Add the 1s. Then add the 10s.	Add the 1s. Then add the 10s. T O 5 4 + 2 8 <u>1</u> The exchange is <u>2</u> recorded above the line. T O 5 4 + 2 8 <u>1</u> <u>8 2</u>
Adding two 2-digit numbers with exchange	Add the 1s. Exchange 10 ones for a ten. Then add the 10s.	Add the 1s. Exchange 10 ones for a ten. Then add the 10s.

	Tens Ones 3 6 9 9 4 9 2 q Tens Ones 9 9		
Year 2 Subtraction			
Subtracting multiples of 10	Use known number bonds and unitising to subtract multiples of 10.	Use known number bonds and unitising to subtract multiples of 10. 100 30 $10-3 = 7$	Use known number bonds and unitising to subtract multiples of 10. 7 7 7 7 7 7 7 7 7 7
	So, 8 tens subtract 6 tens is 2 tens.	So, 10 tens subtract 3 tens is 7 tens.	7 tens subtract 5 tens is 2 tens. 70 - 50 = 20
Subtracting a single-digit number	Subtract the 1s. This may be done in or out of a place value grid.	Subtract the 1s. This may be done in or out of a place value grid.	Subtract the 1s. Understand the link between counting back and subtracting the 1s using known bonds.

			30 3I 32 33 34 35 36 37 38 39 40
		T O	$ \begin{array}{r} T & O \\ \overline{3} & q \\ - & 3 \\ \overline{3} & 6 \\ \overline{39 - 3} = 6 \\ \overline{39 - 3} = 36 \end{array} $
Subtracting a single-digit	Bridge 10 by using known bonds.	Bridge 10 by using known bonds.	Bridge 10 by using known bonds.
number bridging 10			-4 -4 16 17 18 19 20 21 22 23 24 25 26
	35 – 6 I took away 5 counters, then 1 more.	35 – 6 First, I will subtract 5, then 1.	24 - 6 = ? 24 - 4 - 2 = ?
Subtracting a single-digit	Exchange 1 ten for 10 ones. This may be done in or out of a place value grid.	Exchange 1 ten for 10 ones.	Exchange 1 ten for 10 ones.
number using exchange			$ \begin{array}{c ccccccccccccccccccccccccccccccccccc$
			<u> 8</u> 25 - 7 = 18

Subtracting a 2-digit number	Subtract by taking away.	Subtract the 10s and the 1s.	Subtract the 10s and the 1s.
	0 0	This can be represented on a 100 square. $ \begin{array}{c ccccccccccccccccccccccccccccccccccc$	This can be represented on a number line. $\begin{array}{r} -10 & -10 & -10 & -10 \\ \hline 23 & 33 & 43 & 53 & 63 & 64 \\ \hline 64 - 41 = ? \\ \hline 64 - 1 = 63 \\ \hline 63 - 40 = 23 \\ \hline 64 - 41 = 23 \\ \hline \hline -5 & -10 & -10 \\ \hline 21 & 26 & 36 & 46 \\ \hline 46 - 20 = 26 \\ \hline 26 - 5 = 21 \\ \hline 46 - 25 = 21 \end{array}$
Subtracting a 2-digit number using place value and columns	Subtract the 1s. Then subtract the 10s. This may be done in or out of a place value grid. TO 000000 000000 000000 000000 000000 000000 0000000 0000000 00000000	Subtract the 1s. Then subtract the 10s.	Using column subtraction, subtract the 1s. Then subtract the 10s. $ \begin{array}{r} T \\ -1 \\ -1 \\ -3 \\ -1 \\ -3 \\ -1 \\ 3 \\ -1 \\ -3 \\ -1 \\ 3 \\ -1 \\ -3 \\ -1 \\ -3 \\ -1 \\ -3 \\ -1 \\ -3 \\ -1 \\ -3 \\ -1 \\ -3 \\ -1 \\ -3 \\ -1 \\ -3 \\ -1 \\ -3 \\ -1 \\ -3 \\ -1 \\ -3 \\ -1 \\ -3 \\ -1 \\ -1$

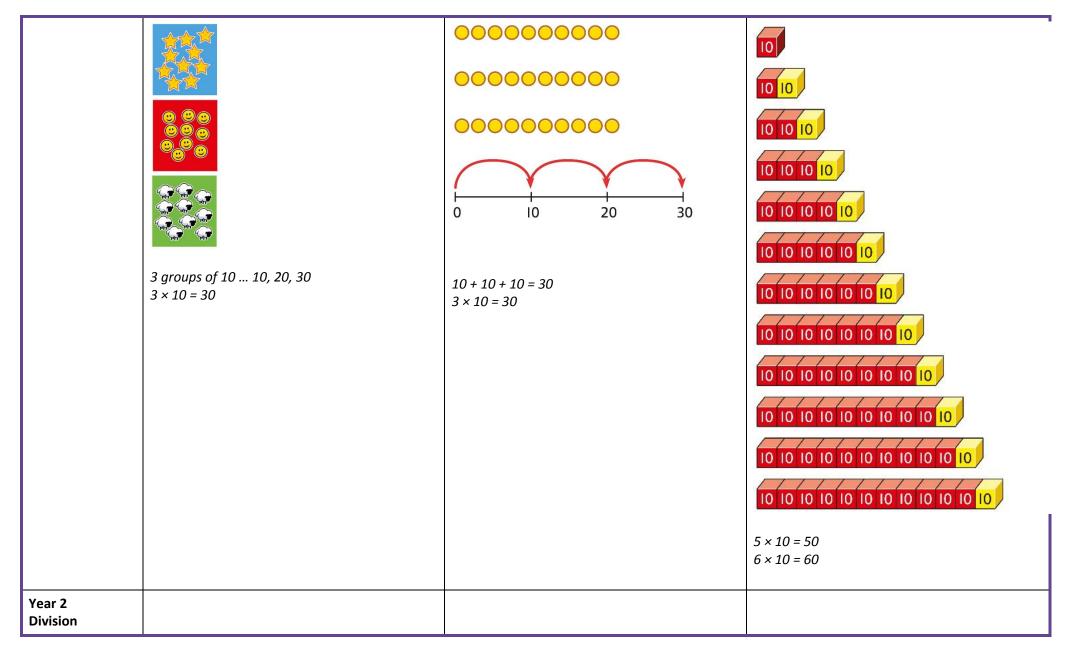

Subtracting a 2-digit number with exchange		Exchange 1 ten for 10 ones. Then subtract the 1s. Then subtract the 10s.	Using column subtraction, exchange 1 ten for 10 ones. Then subtract the 1s. Then subtract the 10s.
		9 9 9 9 9 9 9 9 9 9 9 9 9	$\begin{array}{c c} T & O \\ \hline 4 & 5 \\ \hline -2 & 7 \end{array}$
		Tens Ones Image: Second seco	$ \frac{T \ O}{{}^{3}\# {}^{1}5} - 2 \ 7 $
		Tens Ones Image: Second seco	$ \frac{T O}{{}^{3}\not{4} {}^{1}5} - 2 7 - 8 $
		Tens Ones Image: Construction of the second secon	$ \begin{array}{c} T & O \\ _{3} \not 4 & {}^{1} 5 \\ - \underline{2 & 7} \\ \overline{1 & 8} \end{array} $
Year 2 Multiplication			
Equal groups and repeated addition	Recognise equal groups and write as repeated addition and as multiplication.	Recognise equal groups using standard objects such as counters and write as repeated addition and multiplication.	Use a number line and write as repeated addition and as multiplication.
	3 groups of 5 chairs 15 chairs altogether	3 groups of 5 15 in total	5 + 5 + 5 = 15 3 × 5 = 15

Using arrays to represent multiplication	Understand the relationship between arrays, multiplication and repeated addition.	Understand the relationship between arrays, multiplication and repeated addition.	Understand the relationship between arrays, multiplication and repeated addition.
and support understanding	4 groups of 5	4 groups of 5 5 groups of 5	0 5 10 15 20 25 5 × 5 = 25
Understanding commutativity	Use arrays to visualise commutativity.	Form arrays using counters to visualise commutativity. Rotate the array to show that orientation does not change the multiplication.	Use arrays to visualise commutativity. 4+4+4+4+4=20 5+5+5+5=20
Learning ×2, ×5 and ×10 table facts	Develop an understanding of how to unitise groups of 2, 5 and 10 and learn corresponding times-table facts.	Understand how to relate counting in unitised groups and repeated addition with knowing key times-table facts.	$4 \times 5 = 20$ and $5 \times 4 = 20$ Understand how the times-tables increase and contain patterns.

Sharing equally	Start with a whole and share into equal parts, one at a time.	Represent the objects shared into equal parts using a bar model.	Use a bar model to support understanding of the division.
	000000000000000000000000000000000000000		
		20 shared into 5 equal parts.	18 ÷ 2 = 9
	12 shared equally between 2.	There are 4 in each part.	10 ÷ 2 = 9
	They get 6 each.		
	Start to understand how this also relates to grouping. To share equally between 3 people, take a group of 3 and give 1 to each person. Keep going until all the objects have been shared		
	Image: second		
	15 shared equally between 3. They get 5 each.		
Grouping equally	Understand how to make equal groups from a whole.	Understand the relationship between grouping and the division statements.	Understand how to relate division by grouping to repeated subtraction.

		$12 \div 3 = 4$ $12 \div 4 = 3$ $12 \div 6 = 2$ $12 \div 2 = 6$	$\begin{array}{c ccccccccccccccccccccccccccccccccccc$
Using known times-tables to solve divisions	Understand the relationship between multiplication facts and division.	Link equal grouping with repeated subtraction and known times-table facts to support division. 40 divided by 4 is 10. Use a bar model to support understanding of the link between times-table knowledge and division. 60 60 10	Relate times-table knowledge directly to division. $I \times I0 = I0$ $2 \times I0 = 20$ $3 \times I0 = 30$ $4 \times I0 = 40$ $5 \times I0 = 50$ $6 \times I0 = 60$ $7 \times I0 = 70$ $8 \times I0 = 80$ <i>I</i> used the I0 times-table to help me. $3 \times I0 = 30$. <i>I</i> know that 3 groups of 10 makes 30, so I know that 30 divided by 10 is 3. $3 \times 10 = 30$ so $30 \div 10 = 3$
